PROFILE

Motivated aspiring data scientist with strong perseverance, excellent communication skills, and a passion for teamwork and leadership. Eager to contribute analytical expertise and grow in data-driven environments. Technically proficient in Machine Learning, Artificial Intelligence, Data Analytics, and Big Data. Adept at implementing data science workflows to transform raw data into actionable insights through data manipulation, modelling, and visualization.

ACADEMIC BACKGROUND

01/2021- Today	Data Science (M.Sc.), TU Dortmund, Dortmund Coursework: Statistical Learning for Big Data, Applied Bayesian Data Analysis, Statistics in Genetics, etc.
04/2024 – 10/2024	Computational Neurology (Exchange program), Ruhr-University, Bochum Coursework: Applied time series analysis and statistical modelling to detect epilepsy. Grade: 2.3 (German Scale)
09/2023-10/2023	Advanced Data Analytics (Erasmus+), University of Naples, Italy. Coursework: Focused on applied analytics techniques in a cross-cultural setting. Grade: 2.3 (German Scale).
01/2014 – 04/2018	Electrical and Electronic Engineering (B.Sc.), AIUB, Bangladesh Grade: 2.74 (North American Scale)

ACADEMIC PROJECT AND CASE STUDIES

10/2024	Project on Car price prediction using Bayesian GLM (Gaussian) with BRMS in R, leveraging probabilistic inference. Improved prediction accuracy by 72.25% through advanced statistical techniques.
02/2024	Conducted a case study on Comparison of multiple distributions. Performed statistical analysis using ANOVA, t-tests, and multiple hypothesis tests to examine pricing trends.
01/2024	Discovered that faster host responses led to a 23% increase in prices across 232 Airbnb listings. Conducted a case study on descriptive analysis of demographic data. Analysed global demographic data and regional trends, collaborating to identify patterns and showcasing analytical and detail-oriented skills.
11/2017	Bachelor Thesis on Electricity Generation Using three chamber microbial fuel cell.

JOB EXPERIENCE

06/2018 – 02/2019	Business Analyst (Market research and Price Analysis), Infolink Limited, Dhaka, Bangladesh - Led a team of 5–10 analysts to enhance market research and pricing strategies. - Applied EDA, statistical modelling, and predictive analytics, delivering 20+ reports on time. - Developed regression-based pricing models and conducted A/B testing, boosting revenue by 10%.
-------------------	---

SKILLS

Languages	German (B2), English (C1), Bengali (Native).
Programming Skills,	Python (Pandas, NumPy, Scikit-learn), R (Tidyverse, BSRM), SQL (PostgreSQL), C, C++. Power BI, Tableau,
Data Visualizations & BI	Excel, PowerPoint.
Statistical Techniques	Statistical Testing, Statistical Modelling, Exploratory Data Analysis (EDA).
Tools and Platforms	Microsoft Fabric (Lakehouse, Warehouse, Dataflows Gen2, PySpark), Jira, Confluence, DAX, Power Query, MS Azure.
Soft Skills	Communication, Time Management, Leadership, Team Collaboration, Problem Solving & Critical Thinking.

EXTRACURRICULAR ACTIVITIES

10/2024 - Today	Participate in D-LAB . - An interdisciplinary Certificate program in Digital Technology Management focused on entrepreneurship. - Collaborating with diverse peers to develop a startup idea and refine management skills.
04/2024	Centrum für Entrepreneurship & Transfer. 2nd place for the implementation of AI-based travel solutions at the TU Startup Weekend among 20+ teams.
